History of Peppol

- Peppol began in 2008 as a large-scale pilot financed by the European Commission and Consortium members.
- In 2012, the Peppol project was finalised, and its services and responsibilities were taken over by OpenPeppol, a non-profit international association established under Belgian law.
- OpenPeppol is responsible for the development and maintenance of the Peppol specifications, building blocks and its services and implementation

| EESPA

A view from Europe

Erik Timmermans – DSPANZ webinar 16 August 2022

Introducing EESPA

- European E-Invoicing Service Providers Association
- Launched in Brussels 2011
- 90+ members: both regional and world players
- Core activities around e-invoicing , but with extended scope:
Connecting Trading Partners in the Supply Chain
- Mission:
 - Support Market Awareness and Market Development
 - Represent & Defend Industry with external stakeholders
 - Develop a vibrant community for networking & learning
 - Provide a framework for interoperability between members

EU policy engagement with e-Invoicing

- Recognition of business benefits: cost, efficiency, sustainability, transparency, faster payments, and less fraud
- VAT Directives (2006 and 2010) put e-Invoicing on an equivalent basis to paper and set rules for 'authenticity and integrity' for e-invoices
- EU made it mandatory for public contacting entities to be able to receive e-invoices in a new standard format: EN 16931 (Directive 2014/55/EU). Some Member States are mandating adoption for suppliers to drive adoption
- EU invested in the Connecting Europe facility (CEF)- to provide technical artefacts used by PEPPOL and EESPA (EIN).

Recent developments

- Individual Member States introducing tax agency systems requiring real-time reporting of invoice data to reduce the VAT Tax Gap - Continuous Transaction Controls (CTC)
- EU cases: Italy, Spain, Portugal, Greece, Hungary, Poland, France (in development),... others to follow
- European Commission launched a “VAT in the Digital Age” Study in 2021- results awaited
- EESPA, Peppol, DSPANZ, VeR (Germany), GIF,... joined forces to recommend “DCTCE model” : Recommendation for a decentralised approach beneficial to both economic operators and tax administrations for the digitisation of VAT reporting based on Continuous Transaction Controls **and** electronic invoicing in Europe

Asia: Singapore & Japan

United States of America

The Business Payments Coalition (supported by the US Federal Reserve) has been looking at:

- How the US payments network can be modernised. (ISO2002)
- How eInvoicing can be operationalised in the US market by 2023.
 - eInvoicing Exchange Framework (similarities with Peppol)
 - Market Pilot: Running now through to the end of 2022.
- How E-remittance can close the loop between eInvoicing and Payments.

How You Can Get Involved in A-NZ

dspanz.
